

Pregraduate researchers

Linda Ruohua Feng
Pregraduate researcher

Linda's research focuses on improving the diagnostic utility of 18F-FDG-PET in the diagnosis of Lewy body dementia.

Clara Møllergaard Jensen
MD, Pregraduate researcher

Clara's research focuses on non-cognitive symptoms in the early disease stages of Lewy body disease in order to improve the understanding of disease mechanisms and to improve early diagnosis.

Malthe Uhre Hansen
Pregraduate researcher

Malthe's project aim is to characterize a cohort of patients with both CSF and PET amyloid assessments in order to assess their clinical and biochemical profiles.
