

Associated researchers

(Currently employed elsewhere)

Ane Nørgaard Christensen

MD, PhD, Associated researcher

Ane's research focuses on the use of antipsychotics and other psychotropic drugs in patients with dementia and investigates the mortality risk associated with the use of psychotropic drugs and a neuroblastoma knock-out model.

Alix Nessa Feldman

MA, PhD student, Associated researcher

Alix's project investigates hearing loss in patients with mild cognitive impairment and the association between listening effort and cognitive function using the measurement of pupil dilation. The project also explores avenues for integration between hearing and cognitive care systems.

Helena S. Glerup

Associated researcher

Helena's research investigates whether saliva can be a viable biofluid for the detection of biomarkers of neurodegenerative diseases, especially AD.
