

Short Curriculum Vitae

Asmus Vogel

Neuropsychologist at the Danish Dementia Research Center and associate professor in clinical neuropsychology at the Department of Psychology, University of Copenhagen.

Major research focus is on cognitive deficits in dementia diseases and neuropsychological functions (memory, executive functions, attention etc.). He is initiating and coordinating studies on development and validation of cognitive tests applied in memory clinics.

He has conducted several studies on neuropsychological dysfunction in Alzheimer's disease and Mild Cognitive Impairment, but has also studied cognitive processes and affective symptoms in other disorders (e.g. SLE, Fabry disease and Graves' disease) and normal aging.

Current research projects involves cognitive deficits and personality changes in Huntingtons disease, Subjective Cognitive Decline in aging and validation of new Danish cognitive tests for the diagnosis of Alzheimer's disease

He has published 44 research articles in peer-review journals. He has contributed to books on cognitive processes and clinical neuropsychology.
